GRACE Electronics LLC

Our People:

GRACE was established by top aerospace directors, managers, engineers and scientists to provide a competent competitive source of support for legacy and production aircraft programs. Endeavoring to remain a significant supplier in the future, GRACE continues to seek out new business opportunities and focus on

meeting customers' needs. Our flexibility comes through our structure.

The GRACE Electronics Core Group consists of:

- ◆ A highly flexible management organization
- ◆ An extensive resource pool of talented highly skilled, dedicated engineers and technicians
- ◆ Strict configuration control/quality policies
- ◆ A fully integrated supply chain to handle any and all program requirements.

In addition to our staff of full-time employees, the overall organization consists of numerous part-time specialists in various disciplines.

Capabilities:

- ◆ Fabrication of electrical / mechanical assemblies
 - Junction boxes, power distribution boxes, control panels, switching units etc.
- ◆ Cable and harness fabrication
- ◆ Machine shop
- ◆ ILS (GSE/PGSE)
 - Break-out boxes
 - Test Program Sets: ID's, cables, software

GRACE Electronics LLC

Specialties

- ◆ Rapid prototyping
- ◆ Technology insertion
 - Resolve obsolescence issues
 - Reverse engineering
- ◆ CCA design and fabrication
- ◆ Contractor Maintenance support
 - Depot, Intermediate and Organizational Levels
- ◆ Repair of repairables

Discriminators:

What sets GRACE Electronics apart is that we are not just a 'build to print' shop; we provide extensive engineering insight into any customer design avoiding costly problems and rework. GRACE has never failed to maintain 100% on-time delivery status.

GRACE can solve your most complex problems with an unsurpassed degree of technical expertise and skills. The 'learning curve' is behind us.

Our Facilities:

GRACE Electronics is headquartered in the industrial park adjacent to the LI McArthur Airport in New York. Our fully equipped facility is ideally suited for:

- ◆ Design
- ◆ Electro-mechanical assembly
- ◆ Cable and harness fabrication
- ◆ Test operations
- ◆ Repair

GRACE Electronics LLC

Current Relevant Programs:

GRACE Electronics is currently approved to manufacture and repair assemblies for various aircraft programs including EA-6B, E-2C, and F-14. Examples of our Military contracts include fabrication and repair of avionics equipment for EA-6B (Cockpit Control Panels) and F-14 (Computer Navigation Equipment).

GRACE Electronics also manufactures quality products for major Military defense contractors.

Quality:

GRACE is well aware of the Quality System requirements that flow down to us as a supplier. We have completed and implemented the rigorous requirements of ISO-9001:2000 and are working toward our AS 9100 certification. Our workmanship is preformed in accordance with the IPC-A-610 and J-STD-001. We are currently qualified to MIL-Q-9858 and under cognizance of the DCMA in Garden City, New York.

Our Commitment:

GRACE Electronics is dedicated to bringing the highest level of quality and service to our customers, on-time, and at greatly reduced costs. Our pledge is to become your hands-on project manager – handling every aspect of the task from start to finish and ensuring its successful completion. Our commitment is to continue to meet our 100% on-time delivery status with zero (0) defects.

Our Rates:

Our rate schedule is typically less than half of the comparable rates charged by larger firms. We offer the 'real' OEM advantage with the 'lessons learned' inherent in our people. To discuss your current requirements, please contact us today.
